## 1. INSTALLATION (ANDROID, IOS, WWW)

It contains tips on how to install applications on mobile devices with Android and iOS and how to access the content of the website.

#### 1.1. ANDROID

The mobile application is available for download in the Google Play store. Users who have mobile devices (phones or tablets) with Android operating system **4.4** or newer have an access to the application. You have to sign in to your Google account for getting an access to the store.

Figure 1.1 – Application installation Android

You can also scan the QR code or click the Google Play button below to open PDS Supplier application card in Google Play store.

Figure 1.3 - QR Code Android

## 1.2. IOS

The mobile application for iOS system is available to download in App Store. The application can be installed on apple devices with **iOS system in version 11.4 or newer**. You need an apple account for getting an access to the store.

#### 1.3. WEB APPLICATION

The web application PDS Supplier is available in the following address: <u>https://pds.rmgastro.com/Main</u>

To access the application, you must have an active account of supplier that is created from the PDS PC program in the **Users External** window.

## 3. RESET PASSWORD (ANDROID, IOS, WWW)

The username and email address that is assigned to the account is required to reset the password. After selecting **Reset Password** button, an email will be sent with a link that will redirect you to a website where you can set a new password for your account. The password must be changed within one hour. After the specified time has elapsed, the link becomes inactive and the described activities should be repeated.

Figure 3.1 - Reset password

## 4. PRODUCTS TO VERIFY (ANDROID, IOS, WWW)

The table contains products that should be verified by the user. It consists of a header and lines of products. The attribute names are displayed in the header. The attribute name language is set based on the device language. For a web application, the language of the attribute names depends on the language of the website (Web Application). A single row in the table consists of columns that contain attribute values for the given product. The application displays the attributes to which the supplier has rights.

#### 5.1. SUGGEST VALUE (ANDROID, IOS, WWW)

The supplier can suggest a new value for the displayed attributes. To set a new value, hit the button (Figure 5.8 - Product attributes Android), in the **Product attributes** window, which will launch the editing mode. Then, after clicking the item on the list, a window will appear in which you should enter a new value for the selected attribute. To publish the suggested changes, select the button (Figure 5.10 - Product attributes Android). All values that have been entered in the application will be available to other suppliers who have permissions for these attributes (Figure 5.9 - Product attributes Android).

Figure 5.5 Suggest value

### 5.2. VERIFY ATTRIBUTE (ANDROID, IOS, WWW)

To verify the attributes, enter the verification mode (Figure 5.10 - Product attributes Android). Then select the attributes that need to be verified. After selecting the attributes, click (Figure 5.13 - Product attributes iOS). Verified attributes will be valid for next 365 days from day when this value has been verified (Figure 5.13 - Product attributes iOS).

## 6. UPLOAD/EXPORT SUGGESTED VALUES (WWW)

The web application has the function of exporting products with attributes to an Excel file from the product table for verification for suggest a new values. The Excel file generates a table to which the supplier can enter new values for attributes (Figure 6.1 - Products to verify WWW). The table contains a header and products with attributes. The attribute names are displayed in the header. Yellow cells are used to enter the suggested values. It is not recommended to change the table structure in the Excel file, because it will not be possible to correctly import the attributes from the Excel file into the web application.

Figure 6.2 – Excel

To import the boiled Excel file, use the button **Choose file** (Figure 6.4 - Products to verify WWW), which launches the dialog box. In the dialog box, select the prepared Excel file with the extension **.xls**. When the file is sent correctly to the server, select **Upload from Excel** button (Figure 6.3 - Products to verify WWW). Data from the file will be converted and then displayed in the table (Figure 6.5 - Suggested values WWW). The button **Send suggestions** (Figure 6.5 - Suggested values WWW) is used to publish the suggested changes. All entered values are now available for viewing for other suppliers who have permissions for these attributes.

# 7. CHANGING PASSWORD

The feature is available from Settings window on the mobile application iOS and Android (from Products to verify page window on the web page). Before you attempt to change the password, you have to know your current password. You have to keep in mind that the all text fields must be filled.

Figure 7.1 Change password (Mobile)

									Ch	ange passwo	rd Sign	out

Figure 7.2 Change password (WEB)

# 8. FILTERING (WWW)

There are two types of filters:

1. Main filter – filter returns rows by scanning all columns in order to find a specific value,

PDS Sup	plier								Cha	nge passwoi	<sup>.</sup> d Sign o	ut
Produ	cts to verify	English	- C	Downloa	ad to Excel	Uploa Choose File No	d from Excel file chosen		Search		]	
MID	Ordering Code CZ	Original designation	Original description	Suppliers gross price	Suppliers discount [%]	Suppliers net price	Packing quantity purchasing	Packaging unit type	Net Height [mm]	Gross Height [mm]	Net Weight [kg]	Gross Weight [kg]
Q	Q	٩	٩			۹	۹	Q	۹	Q	Q	Q

305	970744/5	970744/5	Disco E1S AK			30.80	1	ks	10	30	0.45	0.45

2. **Column filter** – filter return rows by scanning a specific column in order to find a specific value. Filter works by entering value into text field below the header of the column.

MID	Ordering Code CZ	Original designation	Original description	Suppliers gross price	Suppliers discount [%]	Suppliers net price	Packing quantity purchasing	P
Q	۹	۹	۹			۹	۹	C
304	970757/S	970757/S	Disco D8x8 SX LEFT GRID +			46.10	1	k

# 9. FILTERING (ANDROID, IOS)

Filter works by entering the value into text field. Filter scans all columns in order to find rows with the specific value. For now there is no column filter available in mobile applications.
